I. Introduction

The NRC is amending its regulations in parts 2, 21, 37, 50, 52, 73, and 110 of title 10 of the *Code of Federal Regulations* (10 CFR) to make miscellaneous corrections. These changes include removing obsolete language and correcting references, a typographical error, mailing, e-mail, and web page addresses, grammatical errors, a

division title, and a division address and title. This document is necessary to inform the public of these non-substantive amendments to the NRC's regulations.

II. Summary of Changes

10 CFR Part 2

10 CFR Part 21

Correct typographical error. In § 21.3(2), this final rule corrects a typographical error to reference subpart B instead of subpart C.

10 CFR Part 37

Correct address. In § 37.23(b)(2), this final rule removes the incorrect mailing address, ATTN: Document Control Desk; Director, Office of Nuclear Material Safety and Safeguards and replaces it with the correct mailing address, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; ATTN: Source Management and Protection Branch. In § 37.27(c)(1) and (2), this final rule corrects a mail stop, two e-mail addresses, a division title, and the title of a web page.

10 CFR Part 50

Correct grammatical errors. This final rule corrects grammatical errors in § 50.36(c)(1)(i)(A) and appendix B to 10 CFR part 50, Section I, Organization. In § 50.36(c)(1)(i)(A), the phrase, integrity of certain of the physical barriers is corrected to

read integrity of certain physical barriers. The first word in the seventh sentence in appendix B, section I, Organization, is corrected to read “The” instead of “There.”

Correct Reference. In appendix J to 10 CFR part 50, option B, subsection IV, Recordkeeping, this final rule removes the reference to § 50.72(b)(1)(ii).

10 CFR Part 52

Remove Obsolete Language. In §§ 52.43(b) and 52.79(c)(2), this final rule removes the word “final” when describing a standard design approval.

Correct Reference. In § 52.83(b), this final rule removes the incorrect reference to § 2.617(b)(2) and replaces it with the correct reference to § 2.627(b)(2). 10 CFR Part 73

Correct Division Address and Title. In § 73.57(e)(2), this final rule corrects the address and title of a division within the Federal Bureau of Investigation.

Correct Reference. In § 73.70(c), this final rule removes the incorrect reference to § 73.55(d)(6) and replaces it with the correct reference to § 73.55(g)(7). In § 73.71(a)(2), this final rule removes the incorrect reference to § 73.21(g)(3) and replaces it with the correct reference to § 73.22(f)(3). In appendix B, VI.B.1(a)(4), this final rule removes reference to § 73.19 to ensure clarity and orderly codification, as there have never been requirements in § 73.19.

Correct mailing address. In § 73.72(a)(1), this final rule corrects the mailing address where licensees must provide an advance notification of shipment of formula quantities of strategic special nuclear material, special nuclear material of moderate strategic significance, or irradiated reactor fuel.

10 CFR Part 110

Correct Reference. In § 110.42(e)(1), this final rule removes the incorrect reference to § 110.32(h) and replaces it with the correct reference to § 110.32(g).

III. Rulemaking Procedure

Under section 553(b) of the Administrative Procedure Act (5 U.S.C. 553(b)), an agency may waive the requirements for publication in the *Federal Register* of a notice of proposed rulemaking and opportunity for comment if it finds, for good cause, that it is impracticable, unnecessary, or contrary to the public interest. As authorized by 5 U.S.C. 553(b)(3)(B), the NRC finds good cause to waive notice and opportunity for comment on these amendments, because notice and opportunity for comment is unnecessary. The amendments will have no substantive impact and are of a minor and administrative nature dealing with corrections to certain CFR sections or are related only to management, organization, procedure, and practice. These changes include removing obsolete language and correcting references, a typographical error, mailing, e-mail, and web page addresses, grammatical errors, a division title, and a division address and title. The Commission is exercising its authority under 5 U.S.C. 553(b) to publish these amendments as a final rule. The amendments are effective on **[INSERT DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE *FEDERAL REGISTER*]**. These

amendments do not require action by any person or entity regulated by the NRC, and do not change the substantive responsibilities of any person or entity regulated by the NRC.

IV. Environmental Impact: Categorical Exclusion

The NRC has determined that this final rule is the type of action described in § 51.22(c)(2), which categorically excludes from environmental review rules that are corrective or of a minor, nonpolicy nature and do not substantially modify existing regulations. Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

V. Paperwork Reduction Act

This final rule does not contain a collection of information as defined in the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and, therefore, is not subject to the requirements of the Paperwork Reduction Act of 1995.

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the document requesting or requiring the collection displays a currently valid OMB control number.

VI. Plain Writing

The Plain Writing Act of 2019 (Pub. L. 111-274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31883).

VII. Backfitting and Issue Finality

The NRC has determined that the corrections in this final rule do not constitute backfitting and are not inconsistent with any of the issue finality provisions in 10 CFR part 52. The amendments are non-substantive in nature, including removing obsolete language and correcting references, a typographical error, mailing, e-mail, and web page addresses, grammatical errors, a division title, and a division address and title. They impose no new requirements and make no substantive changes to the regulations. The corrections do not involve any provisions that would impose backfits as defined in 10 CFR chapter I or would be inconsistent with the issue finality provisions in 10 CFR part 52. For these reasons, the issuance of this rule in final form would not constitute backfitting or represent a violation of any of the issue finality provisions in 10 CFR part 52. Therefore, the NRC has not prepared any additional documentation for this correction rulemaking addressing backfitting or issue finality.

VIII. Congressional Review Act

This final rule is not a rule as defined in the Congressional Review Act (5 U.S.C. 801-808).

IX. Agreement State Compatibility

Under the “Agreement State Program Policy Statement” approved by the Commission on October 2, 2017, and published in the *Federal Register* on October 18, 2017 (82 FR 48535), NRC program elements (including regulations) are placed into compatibility categories A, B, C, D, NRC, or adequacy category Health and Safety (H&S). Compatibility Category A program elements are those program elements that are basic radiation protection standards and scientific terms and definitions that are necessary to understand radiation protection concepts. An Agreement State should adopt Category A program elements in an essentially identical manner in order to provide uniformity in the regulation of agreement material on a nationwide basis. Compatibility Category B program elements are those program elements that apply to activities that have direct and significant effects in multiple jurisdictions. An Agreement State should adopt Category B program elements in an essentially identical manner. Compatibility Category C program elements are those program elements that do not meet the criteria of Category A or B, but contain the essential objectives that an Agreement State should adopt to avoid conflict, duplication, gaps, or other conditions that would jeopardize an orderly pattern in the regulation of agreement material on a national basis. An Agreement State should adopt the essential objectives of the Category C program elements. Compatibility Category D program elements are those program elements that do not meet any of the criteria of Category A, B, or C and, therefore, do not need to be adopted by Agreement States for purposes of compatibility.

Compatibility Category NRC program elements are those program elements that address areas of regulation that cannot be relinquished to the Agreement States under the Atomic Energy Act of 1954, as amended, or provisions of 10 CFR. These program elements should not be adopted by the Agreement States. Adequacy category H&S program elements are program elements that are required because of a particular health and safety role in the regulation of agreement material within the State and should be adopted in a manner that embodies the essential objectives of the NRC program.

The portion of this final rule that amends part 37 is a matter of compatibility between the NRC and the Agreement States, thereby providing consistency among Agreement State and NRC requirements. The compatibility categories are designated in the following table.
